WEB DEVELOPMENT LAB REPORT

Department of Computer Science & Engineering (CSM)

TOPIC 1: BAKERY WEBSITE (BUTTER & BLOOM)

Name: Bhavishya Jonnalagadda **Section:** CSM-05 **Roll No:** 26001130

AIM

To design and implement a responsive website for "Butter & Bloom Bakery" using HTML5 and CSS3, featuring navigation links, menu items grid, interactive cards, gallery, custom ordering, and location information.

PROCEDURE

1. Structure the webpage using standard HTML5 semantic elements (<header>, <nav>, <main>, <section>, <footer>).
2. Define global CSS custom properties (variables) for color palettes including ink, berry, cream, peach, and gold.
3. Build a responsive grid layout using CSS Flexbox for navigation and CSS Grid for products, gallery, and contact information.
4. Integrate media queries to ensure layout adaptability across mobile, tablet, and desktop viewports.

TOPIC 2: HEALTHCARE PORTAL (CLEARVIEW HEALTH CLINIC)

AIM

To design an accessible healthcare web application for "Clearview Health Clinic" containing a specialist physician directory, interactive appointment slot finder, and a comprehensive patient registration interface.

PROCEDURE

1. Construct clean form elements with appropriate input types ('date', 'tel', 'email', 'select', 'textarea') and accessibility features ('aria-label', 'required').
2. Implement CSS Grid for multi-column form layouts, doctor card profiles, and available appointment time pill-badges.
3. Configure outline states ('input:focus') and smooth scrolling to enhance user experience and usability.
4. Utilize CSS flexbox and responsive breakpoints to adapt complex forms for mobile device screens seamlessly.

TOPIC 3: YOGA & WELLNESS STUDIO (STILL & ROOT)

AIM

To construct a serene, fully-featured wellness studio portal for "Still & Root" incorporating class schedules, instructor profiles, membership tier tables, and wellness journal articles.

PROCEDURE

1. Design an earthy color layout leveraging CSS variables for ink, sage, cream, and clay tones.
2. Structure structured tabular data using semantic HTML <table>, <tr>, <th>, and <td> elements for class schedules.
3. Implement card grids with subtle elevation effects ('box-shadow') to highlight instructors, memberships, and journal posts.
4. Apply CSS media queries to streamline table data display and navigation menus on smaller screen sizes.
